

Community Name:	Goodreads	Course:	Ensign College - IT 340 - Fall 2022
Community Type:	A website to keep track of books read.	Student:	Jenafae Holley
Community Description	Community Purpose	Key Products & Services created by, offered by, or used by the community	Key Community Needs that your Business Intelligence (BI) System will support
This is a website that allows readers to keep track of the books they have read. It includes features like ratings, and the ability to see all the books you have read in the past. They take this data and are able to give an overall rating of any given book.	To encourage more reading and to give readers an easier way of seeing if a book is worth their time.	Services: <ul style="list-style-type: none">- rating system- books read- favorite books list- reading goal for the year- overview of your reading year- community- a recommended reading based on what you read in the passed	the community needs to have accurate portrayal of a books rating.. This means keeping track of each book and the ratings that each person gives on the books they have read.
Why does this community interest you?	I am a reader and an active participant in this community reading between 50 and 100 books a year I have an average rating of 2.9 of the books I read (This is a 5 star scale) I think that Goodreads can help people to decide what books they wish to read.		
What are the key entities involved with this community?	Users (aka customers) - these are the people who actually rate the books they each have there own accounts. Authors - these are the people who provide the product we are rating they also use it to advertise there books. Amazon - as a third part that they advertise for.		
How is data being used, can data be used, or should data be used by this community?	data is used to create lists of the most popular books as well as to show what books are rated highly. The data is used to give recommendations for more books a person might enjoy.
